Electro-Voice SxA100+ 12 2-Way Powered Loudspeaker

Product Description

The SxA100+ sets a new standard for powered speakers. Its design provides users multiple inputs with mix capability, an easy-to-use EQ section, and loads of power in a compact, attractive package.

The SxA100+ is a full-range loudspeaker ideal for most applications that require high-quality sound. The system has been designed with careful attention to the dynamic requirements of music to provide high SPL without excessive heat. The high-quality microphone preamplifier provides great sounding vocals and speech. A master level control sets the desired SPL, and line input can be mixed and balanced with a microphone with a level control.

The SxA100+ features linear response that can be easily optimized for speech or music with onboard, multiband equalization.
